## INDEPENDENT AUDITORS' REPORT

To: The Board of Directors of  
Puerto Rico Public Private Partnerships Authority

We have audited the accompanying financial statements of the Puerto Rico Public Private Partnerships Authority, a Component Unit of the Commonwealth of Puerto Rico, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the Puerto Rico Public Private Partnerships Authority's basic financial statements as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Puerto Rico Public Private Partnerships Authority as of June 30, 2019, and the changes in its financial position and its cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Emphasis of Matters**

### ***Uncertainty***

As discussed in Notes 1 and 5 to the basic financial statements, the Authority is responsible for the identification and development of Partnerships viable for the delivery of public infrastructure or the provision or enhancement of public services. For these services, the Authority charges a service fee to other governmental entities. Currently, the Authority's main source of revenue consists of legislative appropriations approved in the budget from the Commonwealth and certify by the Fiscal Oversight Management Board. In addition, the Fiscal Oversight Management Board approves fiscal plans in Commonwealth Instrumentalities, including funds for future Partnerships and the payment for the Authority services. As a result, the Authority's operations are dependent on the Commonwealth's ability to continue providing funding through legislative appropriations and the collection of charges for the execution of a Public Partnership Agreement.

Management's evaluation of the Authority's going concern has identified the financial condition of the Commonwealth as an external matter that may affect the ability of the Authority to continue as a going concern. The Commonwealth and its instrumentalities are in the midst of a profound fiscal crisis and are in the process of restructuring its liabilities under Title III of PROMESA.

The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

### ***Change in Reporting Entity***

As discussed in Note 4, on March 20, 2018, the Governor of the Commonwealth of Puerto Rico signed Executive Order 2018-11, which transfers the Government Authorized Representative from the Puerto Rico Emergency Management Agency, an agency of the Commonwealth of Puerto Rico, to the Central Recovery and Reconstruction Office of Puerto Rico. The executive order also transferred to the Central Recovery and Reconstruction Office of Puerto Rico all the administrative functions, funds, available budget, financial instruments, state or federal appropriations to be received in the future, documents, equipment, files and records related to the Government Authorized Representative, including the work unit or employees. In addition, the Executive Order appoints to the Central Recovery and Reconstruction Office of Puerto Rico as grantee of all the Federal Emergency Management Agency's grant awards.

**Other Matter**

*Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, on pages 4 to 11, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

San Juan, Puerto Rico  
January 5, 2022.

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED) AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

---

This management's discussion and analysis section (MD&A) provides a narrative overview and analysis of the financial activities of Puerto Rico Public Private Partnerships Authority (the Authority) for the fiscal year ended June 30, 2019. The MD&A is intended to serve as an introduction to the Authority's basic financial statements, which have the following components: (1) Government-wide financial statements, (2) fund financial statements, and (3) notes to the basic financial statements. The MD&A is designed to (a) assist the reader in focusing on significant matters, (b) provide an overview of the Authority's financial activities, and (c) identify changes in the Authority's financial position and identify individual issues or concerns. The following presentation is by necessity highly summarized, and therefore, in order to gain a thorough understanding of the Authority's financial condition, the basic financial statements, notes, and required supplementary information should be reviewed in its entirety.

### 1. FINANCIAL HIGHLIGHTS

- The Authority's Total Assets government-wide was approximately \$162.9 million as of June 30, 2019, an increase of \$134.3 million or 470% when compared to prior year.
- The Authority's Total Liabilities government-wide was approximately \$166.1 million as of June 30, 2019, an increase of \$128.5 million or 342% when compared to prior year.
- The Authority's Total Net Deficit government-wide was approximately \$3.1 million as of June 30, 2019, a decrease of \$5.5 million or -63% when compared to prior year.

### 2. OVERVIEW OF THE FINANCIAL STATEMENTS

Management's Discussion and Analysis is required supplementary information to the basic financial statements and is intended to serve as an introduction to the Authority's basic financial statements for the fiscal year ended June 30, 2019. The basic financial statements consist of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the basic financial statements.

**Government-wide Financial Statements** - The government-wide financial statements provide readers a broad view of the Authority's operations in a manner similar to a private-sector business. The statements provide both short and long-term information about the Authority's financial position, which assists in assessing the Authority's economic condition at the end of the fiscal year. These are prepared using the economic resources measurement focus and the full accrual basis of accounting. This means they follow methods that are similar to those used by most private businesses. They take into account all revenue and expenses connected with the fiscal year even if cash involved has not been received or paid.

The government-wide financial statements include two statements:

- **Statement of Net Position** - This statement presents all of the government's assets, liabilities, and deferred outflows and inflows of resources. Net position is the difference between (a) assets and deferred outflows of resources and (b) liabilities and deferred inflows of resources. Over time, increases or decreases in the Authority's net position may serve as a useful indicator of whether the financial position of the Authority is improving or deteriorating.
- **Statement of Activities** - This statement presents information showing how the Authority's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenue and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods.

# PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY

(A Component Unit of the Commonwealth of Puerto Rico)

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED) AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

---

In the Statement of Net Position and the Statement of Activities, Authority's operations are divided into the following two kinds of activities:

- (1) **Governmental Activities** - Governmental Activities generally are financed through intergovernmental and other non-exchange revenues.
- (2) **Business-Type Activities** - Business-Type Activities are financed in whole or in part by fees charged for goods or services.

The government-wide financial statements can be found immediately following this MD&A.

### Governmental and Proprietary Funds Financial Statements

Financial statements prepared at the fund level provide additional details about the Authority's financial position and activities. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Authority uses fund accounting to help ensure and demonstrate compliance with finance-related legal requirements. The fund financial statements focus on individual parts of the Authority operations, reporting the Authority's operations in more detail than the government-wide financial statements. Information presented in the fund financial statements differs from the information presented in the government-wide financial statements because the perspective and basis of accounting used to prepare the fund financial statements differ from the perspective and basis of accounting use to prepare the government-wide financial statements. The Authority's governmental and proprietary fund types use different perspectives and accounting basis. All of the funds of the Authority can be divided into the following categories:

**Governmental Fund** - Most of the basic services provided by the Authority are financed through a governmental fund. A governmental fund is used to account for essentially the same functions reported as Governmental Activities in the government-wide financial statements. However, unlike the government-wide financial statements that use the full accrual basis of accounting, the governmental funds financial statements use a modified accrual basis of accounting (also known as the current financial resources measurement focus), which focuses on near-term inflows and outflows of expendable resources. This information may be useful in evaluating the government's near-term financing requirements. These statements provide a detailed short-term view of the Authority's finances and assist in determining whether there will be adequate financial resources available to meet the current needs of the Authority. Since the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for the Governmental Activities in the government-wide financial statements. By comparing the two, readers may better understand the long-term impact of the government's near-term financial decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and the governmental activities. These reconciliations are presented on the page immediately following each governmental fund financial statements.

The Authority has one major governmental fund. That major governmental fund is presented in a separate column in the balance sheet-governmental fund and in the statement of revenues, expenditures, and changes in fund balance-governmental fund. This major fund relates to the activities of the Central Recovery and Reconstruction Office of Puerto Rico (the COR3).

# PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY

(A Component Unit of the Commonwealth of Puerto Rico)

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED) AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

---

**Proprietary Fund-** Proprietary funds provide the same type of information as the Business-Type Activities in the government-wide financial statements, but in more detail. As with government-wide financial statements, proprietary funds financial statements use the full accrual basis of accounting. There is no reconciliation needed between the government-wide financial statements for business-type activities and the proprietary funds financial statements.

The Authority has a proprietary fund. That proprietary fund is presented in a separate column in the statement of net deficit-proprietary fund and in the statement of revenues, expenses, and changes in net position-proprietary fund. This proprietary fund relates to the activities related to the identification analysis and development of Public Private Partnerships projects for the delivery of public infrastructure or the provision or enhancement of public services.

### Notes to Basic Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide financial statements and the fund financial statements. The notes to the basic financial statements can be found immediately following the Statement of Cash Flows- Proprietary Fund.

### 3. GOVERNMENT-WIDE FINANCIAL ANALYSIS

During fiscal year 2017-2018, the Governor of the Commonwealth of Puerto Rico (Governor) created the Central Recovery and Reconstruction Office of Puerto Rico (COR3) through Executive Order 2017-65 (EO-2017-65). COR3 was organized as a division within the Authority, to manage all efforts for the recovery of the Commonwealth of Puerto Rico (Commonwealth) after the passage of Hurricanes Irma and María. Also, through Executive Order 2018-11 (EO 2018-11), the Governor transferred the Governor's Authorized Representative (GAR), which was the entity authorized by the Governor to receive all disaster recovery grants of Federal Emergency Management Agency (FEMA), from Puerto Rico Emergency Management Agency (PREMA) to COR3.

The purpose of COR3 is, among others, to: (i) identify and procure funds, (ii) coordinate efforts and activities, (iii) finance and execute infrastructure works and projects, and (iv) advise the Governor and Commonwealth's instrumentalities over unprecedented amount of state, federal and private resources to be made available to the Commonwealth related to the recovery.

During the fiscal year ended June 30, 2019, the financial operations of COR3 are presented as part of the Authority's basic financial statements.

Since COR3 does not charge for its services, it was necessary to presents Governmental Activities operation within the basic financial statements of the Authority.

Total assets, and total liabilities of the Authority as of June 30, 2019, amounted to approximately \$162.9 million, and \$166.1 million, respectively, for a net deficit of approximately \$3.1 million.

### Governmental Activities

The following is an analysis of the financial position and changes in the financial position of the Authority's Governmental Activities for fiscal year 2019.

# PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY

(A Component Unit of the Commonwealth of Puerto Rico)

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

### Statement of Net Position

Governmental entities are required by U.S. Generally Accepted Accounting Principles (U.S. GAAP), as prescribed by the Governmental Accounting Standard Board (GASB), to report on their net position. The statement of net position presents the value of all the Authority's assets and deferred outflows of resources, and liabilities and deferred inflows of resources, with the difference between them reported as net position.

Net position may serve over time as a useful indicator of a government's financial position. Total assets and total liabilities of the Authority as of June 30, 2019, amounted to approximately \$130.4 million and \$130.3 million, respectively, for a net position of approximately \$74 thousand.

Condensed financial information from the statements of net position as of June 30, 2019, and June 30, 2018, as restated, is as follows (in thousands):

	June 30,		Change	
	2019	2018 (as restated)	Amount	Percentage
Assets	\$ 130,346	\$ 7,881	\$ 122,465	1554%
Liabilities	130,272	9,005	121,267	2188%
Net position	\$ 74	\$ (1,124)	\$ 1,198	(107%)

Total assets increased by approximately \$122.5 million when compared to prior year due to the following: (1) an increase in intergovernmental receivable of approximately \$130.2 million related to amounts requested to FEMA related to natural disaster expenses incurred by subgrantees, netted with due to interfund for approximately \$10.9 million.

Total liabilities increased by approximately \$121.3 million when compared to prior year due to the following: (1) an increase in accounts payable amounting to \$119 million related to professional service vendors (2) an increase in compensated absences for approximately \$244 thousand.

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
(A Component Unit of the Commonwealth of Puerto Rico)

**MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)**  
**AS OF AND FOR THE YEAR ENDED JUNE 30, 2019**

**Statements of Activities and Results of Operations**

Condensed financial information from the statements of activities for the years ended June 30, 2019, and June 30, 2018, is as follows (in thousands):

	<u>June 30,</u>		<u>Change</u>	
	<u>2019</u>	<u>2018</u> <u>(as restated)</u>	<u>Amount</u>	<u>Percentage</u>
<b>Expenses</b>	\$ (2,857,067)	\$ (1,005,171)	\$ (1,851,896)	184%
<b>Program revenues:</b>				
Operating grants and contributions	<u>2,858,265</u>	<u>1,004,522</u>	<u>1,853,743</u>	<u>185%</u>
<b>Change in Net Position</b>	1,198	(649)	1,847	-285%
<b>Net Position (Deficit) - Beginning (as restated)</b>	<u>(1,124)</u>	<u>(475)</u>	<u>(649)</u>	<u>137%</u>
<b>Net Position-Ending</b>	<u>\$ 74</u>	<u>\$ (1,124)</u>	<u>\$ 1,198</u>	<u>-107%</u>

The revenues are composed of approximately \$2.8 billion of Federal Grants and approximately \$35.9 million of Commonwealth's appropriations, an increase of approximately \$1.8 billion. Increase is mainly related to the approval and funds received from FEMA related to Hurricane Irma and María expense reimbursement requested by subgrantees.

The expenses of approximately \$2.9 billion are composed as follows: grant disbursements to sub-grantees of approximately \$2.7 billion related to reimbursement related to Hurricane Irma and María, professional services of approximately \$184.5 million, payroll expenses approximately \$3.9 million, a benefit of approximately \$3.1 million related net pension obligation as a result of the adoption Act 106 approved on fiscal year 2017 and other expenses of approximately \$105 thousand.

Increase in expenses amounting to \$1.9 billion are mainly related to an increase in reimbursement paid to subgrantees.

# PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY

(A Component Unit of the Commonwealth of Puerto Rico)

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

### Business-Type of Activities

The following is an analysis of the financial position and changes in the financial position of the Authority's Business-Type Activities for fiscal year 2019.

### Statement of Net Deficit - Proprietary Fund

Condensed financial information from the statements of net deficit as of June 30, 2019, and June 30, 2018, is as follows (in thousands):

	June 30,		Change	
	2019	2018	Amount	Percentage
<b>Assets</b>	\$ 43,561	\$ 20,724	\$ 22,837	110%
<b>Deferred outflows of resources</b>	-	310	(310)	-100%
<b>Current Liabilities</b>	(16,538)	(14,251)	(2,287)	16%
<b>Non Current Liabilities</b>	(30,284)	(14,104)	(16,180)	115%
<b>Deferred inflows of resources</b>	-	(236)	236	-100%
<b>Net deficit</b>	<u>\$ (3,261)</u>	<u>\$ (7,557)</u>	<u>\$ 4,296</u>	<u>-57%</u>

Total assets amounted to approximately \$43.5 million as of June 30, 2019 and total liabilities amounted to approximately \$46.8 million for a net deficit of approximately \$3.3 million.

Total assets increased by approximately \$22.8 million when compared to prior year due to the following: (1) an increase in cash of approximately \$9.9 million, (2) an increase in due from other fund (COR3) of approximately \$10.9 million for payments made by the Authority on behalf of COR3, (3) an increase in due from Government Development Bank for Puerto Rico (GDB) of approximately \$4.9 million related to overpayments made by GDB related to Authority's payroll taxes which were reimbursed by GDB subsequently to year end, (4) an increase in prepaid expenses of approximately \$355 thousand, and (5) an increase in capital assets of approximately \$14 thousand.

Total liabilities increased by approximately \$18.3 million when compared to prior year due to the following: (1) an increase in accounts payable and accrued liabilities of approximately \$4 million related to amount owed for services provided related to the development of public private partnerships (2) a decrease in net pension liability of approximately \$1.8 million due to the adoption of Act 2016 approved by the Commonwealth during the fiscal year 2018 and (3) and increase in unearned revenues amounting to \$16.1 million due to funds mainly related to appropriations received from the Commonwealth of Puerto Rico of approximately \$21.3 million from which \$8.9 were presented as service charge for services rendered by the Authority for the identification, analysis and development of partnerships projects. Also, during fiscal year ended on June 30, 2019 the Authority received \$9.5 million from the Puerto Electric Power Authority for the development partnership projects from which \$5.7 million were used and presented as service charge for the fiscal year ended on June 30, 2019.

# PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY

(A Component Unit of the Commonwealth of Puerto Rico)

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

### Statements of Revenues, Expenses, and Changes in Net Position

Condensed financial information from the statements of revenues, expenses and change in net position during the years ended June 30, 2019, and June 30, 2018, is as follows (in thousands):

	June 30,		Change	
	2019	2018	Amount	Percentage
Operating Revenues	\$ 16,406	\$ 2,325	\$ 14,081	606%
Expenses	(18,788)	(4,290)	(14,498)	338%
Non Operating Revenues	6,678	2,118	4,560	302%
Change in Net Position	4,296	153	4,143	2708%
Net Deficit-Beginning	(7,557)	(7,710)	153	-2%
Net Deficit-Ending	\$ (3,261)	\$ (7,557)	\$ 4,296	-57%

#### Operating revenues

The Authority service charges increased by approximately \$14.1 million explained as follows: services fee received in an interagency assistance and collaboration agreement with Puerto Rico Electric Power Authority (PREPA) amounting to \$5.7 million; a recovery for a account receivable that was written off amounting to \$1.6 million. Also, there are \$6.8 million of unearned revenues that were realized during the fiscal year 2019 as for the Authority continue working in the development of public private partnership that were paid by the Commonwealth of Puerto Rico for different governmental entities: University of Puerto Rico Housing Project, Maritime Transportation Authorities Ferries Transportation System, Ports Authority Cruise Terminals, Puerto Rico Aqueduct Sewer Authority Meters Replacement and Department of Public Safety Police Academy.

#### Operating Expenses

The Authority's most significant operating expenses correspond to professional services, other operating expenses and interest expense amounting to approximately \$17.9 million, \$2.2 million and \$424 thousands, respectively, for the fiscal year ended June 30, 2019.

Operating expenses increase by \$14.4 million when compared with fiscal year ended on June 3, 2018 mainly related to an increase in professional services amounting to \$14.6 million and other operating expenses amounting to \$1.7 million related to the development of Commonwealth governmental entities public private partnerships, such increases were offset by a decrease amounting to \$1.8 million of pension expense due to the adoption of Act 106 Pay go reform.

Non-Operating revenues increase by \$4.5 million is mainly related to an increase in Commonwealth's appropriations increased by approximately \$4.5 million.

# PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY

(A Component Unit of the Commonwealth of Puerto Rico)

## MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED) AS OF AND FOR THE YEAR ENDED JUNE 30, 2019

---

The Authority's principal activities are to identify, analyze and develop Public Private Partnerships (Partnerships) projects, for the delivery of needed public infrastructure or the provision or enhancement of public services. To that end, the Authority's enabling act (Act 29 of June 8, 2009, as amended) requires the Authority to commission a desirability and convenience study for which the Authority engages specialized professional services. The objective of the desirability and convenience study is to determine the technical and financial feasibility of a proposed Partnership's project. Upon a determination of a project's feasibility under the Partnership model, the Authority may initiate a procurement process, for the identification and qualification of potential proponents and the negotiation and award of Partnership transactions.

#### 4. CURRENTLY KNOWN FACTS

##### *Cost-share for federal grants-*

On August 2020, Cor3 paid the mission assignments by approximately \$12 million. The mission's assignments are related to emergency work performed by a federal entity on behalf of a state entity (i.e., US Army Corps of Engineers performing emergency work for PREPA related to damages to the electrical grid after a disaster). Refer to Note 17 for details.

##### *Intergovernmental agreements-*

In June 2020, PREPA, Luma Energy and the Authority signed the partnership contract for the electric power transmission and distribution system.

Currently, the Authority is working on other Public Private Partnerships related to PREPA energy generation and storage, Puerto Rico Aqueduct and Sewer Authority optimization of the water consumption measurement system and customer service, Puerto Rico Ports Authority modernization of the San Juan Bay cruise terminals and Puerto Rico Police Department consolidated public safety training center. Those projects are in different stages or phases of the procurement process. Refer to Note 15.

#### 5. REQUESTS FOR INFORMATION

This financial report is designed to provide those interested with a general overview of the Authority's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Puerto Rico Public Private Partnerships Authority at the following address: P.O. Box 42001, San Juan, Puerto Rico, 00940-2001.

## **1. REPORTING ENTITY**

Puerto Rico Public Private Partnerships Authority (the Authority) is a Component Unit of the Commonwealth of Puerto Rico (the Commonwealth) and an affiliate of Puerto Rico Fiscal Agency and Financial Advisory Authority (FAFAA), another component unit of the Commonwealth. The Authority was created by Act No. 29 of June 8, 2009, as amended (Act 29). Pursuant to Act 29, the Authority is the sole Commonwealth's governmental entity authorized and responsible for implementing the public policy on public private partnerships (the Partnerships) and for determining the functions, services or facilities for which such Partnerships will be established.

The Authority's principal activities are the identification, analysis and development of Partnerships projects, for the delivery of needed public infrastructure or the provision or enhancement of public services. To that end, the Authority enabling act requires the Authority to prepare or commission the preparation of the desirability and convenience study for which the Authority engages specialized professional services. The objective of the desirability and convenience study is to determine the technical and financial feasibility of a proposed Partnership project. Upon determination of a project's feasibility under the Partnerships model, the Authority may initiate a procurement process for the identification, evaluation, qualification and selection of potential proponents and the negotiation and award of a Partnership agreement.

### **Central Recovery and Reconstruction Office of Puerto Rico**

During fiscal year 2017-2018, the Governor of the Commonwealth of Puerto Rico (the Governor) created the Central Recovery and Reconstruction Office of Puerto Rico (COR3) through Executive Order 2017-65 (EO-2017-65). COR3 was organized as a division within the Authority, to manage all efforts for the recovery of the Commonwealth of Puerto Rico (Commonwealth) after the passage of Hurricanes Irma and María. Also, through Executive Order 2018-11 (EO 2018-11), the Governor transferred the Governor's Authorized Representative (GAR), which was the entity authorized by the Governor to receive all disaster recovery grants of FEMA, from Puerto Rico Emergency Management Agency (PREMA) to COR3.

The purpose of COR3 is, among others, to: (i) identify and procure funds, (ii) coordinate efforts and activities, (iii) finance and execute infrastructure works and projects, and (iv) advise the Governor and Commonwealth's instrumentalities over unprecedented amount of state, federal and private resources to be made available to the Commonwealth related to the recovery.

There are federal funding sources related to disaster recovery that are not administered by COR3 (i.e., HUD's CDBG-DR program, which is managed by the PR Department of Housing). COR3 is only the Recipient of FEMA Public Assistance (PA) and Hazard Mitigation Grant Program (HMGP). There are other FEMA programs where COR3 is not a recipient and only provides limited support but does not manage any federal funds or grants. Also note that for PA and HMGP grant funds other than COR3's own management costs, COR3 acts as a passthrough entity whereby it draws funds from FEMA's SmartLink system and deposits such funds in a subrecipient bank account. Any cost share related to grant awards managed by COR3 should be appropriated by the Commonwealth of Puerto Rico and paid to COR3.

As for Mission Assignments and associated expenses, they relate to emergency work performed by a federal entity on behalf of a state entity (i.e., US Army Corps of Engineers performing emergency work for PREPA related to damages to the electrical grid after a disaster). In these cases, FEMA pays the federal agency directly, and thereafter invoices the Commonwealth of Puerto Rico, through the COR3/GAR, for any outstanding non-federal cost share balance, if applicable. As such, COR3 does not manage any federal moneys related to Mission Assignments but serves as a pass-through entity in relation to any associated non-federal cost share requirements. The GAR is also responsible for executing related paperwork.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

During the fiscal year ended June 30, 2019, the financial operations of COR3 are presented as part of the Authority's basic financial statements.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying basic financial statements of the Authority are presented in conformity with U.S. Generally Accepted Accounting Principles (U.S. GAAP) for governments as prescribed by the Governmental Accounting Standards Board (GASB).

The accompanying basic financial statements present the financial position of the Authority and its various funds, the results of operations and its various funds, and the cash flows of the proprietary funds.

Following is a description of the Authority's most significant accounting policies:

### **Basis of Presentation**

#### *Government-wide Financial Statements*

The government-wide financial statements (the statement of net position and the statement of activities) report information of all the activities of the Authority. The effect of interfund balances has been removed from the government-wide statement of net position (deficit).

Internal balances are not included in the total column of the government-wide statement of net position (deficit). Interfund charges for services among functions of the government-wide statement of activities have not been eliminated. The Authority's activities are distinguished between governmental and business-type activities. Governmental activities generally are financed mainly through intergovernmental revenues and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged for goods or services. The following is a description of the Authority's government-wide financial statements.

The statement of net position (deficit) presents the Authority's assets, liabilities, and deferred inflows of resources, with the residual measure reported as net position (deficit). Net position (deficit) is reported in three categories:

- *Net Investment in Capital Assets* - This component of net position (deficit) consists of capital assets net of accumulated depreciation and reduced by the outstanding balance of any bonds, mortgages, notes, or other borrowings that are directly attributable to the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt are included in this component of net position (deficit).
- *Restricted Net Position (Deficit)* - This component of net position (deficit) consists of restricted assets and deferred outflows of resources reduced by related liabilities and deferred inflows of resources. Generally, a liability relates to restricted assets if the asset results from a resource flow that also results in the recognition of a liability or if the liability will be liquidated with the restricted assets reported. Restricted assets result when constraints placed on those assets' use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constitutional provisions or enabling legislation.

PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY  
(A Component Unit of the Commonwealth of Puerto Rico)

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

- *Unrestricted Net Position (Deficit)* - This component of net position (deficit) is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position (deficit).

When both restricted and unrestricted resources are available for use, it is generally the Authority's policy to use restricted resources first, then the unrestricted resources as they are needed.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenue. Direct expenses are those that are clearly identifiable within a specific function or segment. The Authority does not allocate general government (indirect) expenses to other functions. Program revenues include contributions received from the Federal government and from the Commonwealth, charges for services made to other governmental entities, and grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Revenue that is not classified as program revenue is presented as general revenue. Resources that are dedicated internally are reported as general revenue rather than as program revenue.

Grants are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

#### *Fund Financial Statements*

Fund accounting is designed to demonstrate to aid management by segregating transactions related to certain government functions or activities. A fund is a separate accounting entity with a self-balancing set of accounts. The activities of the Authority that are reported in the accompanying basic financial statements have been classified into governmental and proprietary funds.

Separate financial statements are provided for governmental funds and proprietary funds. Major individual governmental and proprietary funds are reported as separate columns in the fund financial statements.

In accordance with GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, the classification of fund balance is based on the extent to which the Authority is bound to observe constraints imposed upon the use of resources in the governmental funds. The classifications are as follows:

- *Nonspendable* - Amounts that are not in a spendable form or are legally or contractually required to be maintained intact.
- *Restricted* - Amounts that are legally restricted by outside parties, constitutional provisions, or enabling legislation for a specific purpose.
- *Committed* - Amounts that are constrained for specific purposes that are internally imposed by the government's formal action at the highest level of decision-making authority.
- *Assigned* - includes fund balance amounts that are constrained by the Authority and are intended to be used for specific purposes that are neither considered restricted nor committed.
- *Unassigned* - it is the residual classification for the General Fund. In a governmental fund other than the General Fund, a negative amount indicates that the expenditures incurred for a specific purpose exceeded the amounts in the fund that are restricted, committed, and assigned to that purpose.

The Authority has only an unassigned fund balance.

The Authority does not have a formal minimum fund balance policy.

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
(A Component Unit of the Commonwealth of Puerto Rico)

**NOTES TO BASIC FINANCIAL STATEMENTS**  
**June 30, 2019**

---

The following governmental activities of the Authority are classified as major governmental fund:

*COR 3 Program* - General fund accounts for funds received from FEMA and the Commonwealth of Puerto Rico related to reimbursement of expenses related to natural disasters.

*Proprietary Funds*

These funds account for those activities, which are financed and operated in a manner similar to private business enterprises. Management intends to recover, primarily through user charges, the cost of providing goods or services to the general public.

Proprietary funds provide the same type of information as the Business-Type Activities in the government-wide financial statements, but in more detail. As with government-wide financial statements, proprietary funds financial statements use the full accrual basis of accounting. There is no reconciliation needed between the government-wide financial statements for business-type activities and the proprietary funds financial statements.

The Authority reports the following major proprietary fund:

Public Private Partnership Fund which account for all the operations related to the development of a Public Private Partnership.

**Measurement Focus and Basis of Accounting**

*Government-Wide Financial Statements* - The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows takes place. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

*Governmental Fund Financial Statements* - The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenue is recognized as soon as it is both measurable and available, and net of estimated overpayments (as applicable) and amounts considered not collectible. Revenue is considered to be available when it is collectible within the current period or soon enough thereafter to pay liabilities of the current period. Other revenues are considered to be measurable and available only when cash is received.

Expenditures are generally recorded when a liability is incurred, as under accrual basis of accounting. However, compensated absences are recorded as expenditures when matured. General capital assets acquisitions are reported as expenditures in governmental funds.

A summary reconciliation of the difference between total fund balance as reflected in the governmental funds balance sheet and net position of Governmental Activities as shown on the government-wide statement of net position (deficit) is presented in an accompanying reconciliation of the balance sheet of governmental funds to the statement of net position (deficit).

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
(A Component Unit of the Commonwealth of Puerto Rico)

**NOTES TO BASIC FINANCIAL STATEMENTS**  
**June 30, 2019**

---

A summary reconciliation of the difference between net change in fund balance as reflected in the governmental funds statement of revenues, expenditures, and change in fund balance and change in net position in the statement of activities of the government-wide financial statements is presented in the accompanying reconciliation of statement of revenues, expenditures, and change in fund balance of governmental funds to the statement of activities.

The Authority has one major governmental fund. That major governmental fund is presented in a separate column in the balance sheet-governmental fund and in the statement of revenues, expenditures, and changes in fund balance-governmental fund. This major fund relates to the activities of the COR3.

*Proprietary Funds Financial Statements-* The basic financial statements of the proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting, similar to the government-wide financial statements described above. The Authority recognizes revenue when earned under the terms of each agreement and when the collection of the fee is reasonably assured. Expenses are recorded when incurred, regardless of the timing of related cash flows. Operating expenses are those related to the administration of the Authority and costs incurred related to the creation of a Partnership. All revenues and expenses not meeting these criteria are reported as non-operating revenues and expenses.

The Authority's operating revenues are primarily derived from program revenues, services charges, and service fee explained as follows:

- Program revenues - are composed of funds received from Governmental entities to perform feasibility studies for possible Public Private Partnerships.
- Service charges - are costs or expenses incurred by the governmental entity for the services rendered by the Authority resulting from the process for the analysis and development of a Partnership and lower investment partnership projects. Those service charges are recognized as revenues when expenses are incurred.
- Service fees - are included as part of the intergovernmental contracts signed between the Authority and the participating governmental entity(ies) for the analysis and development of a project as a Partnership. In these agreements, the Authority charges service expenses, but in addition a service fee that is normally established as a percentage of the costs or expenses incurred by the Authority in contracting the specialized services necessary for the analysis and development of a Partnership. Also, the Authority charges a cancellation fee, if the corporation or agency withdraws from the project. In this type of contract, service expenses are recognized as revenues when incurred, however the service fee is recognized as revenues when the contract with a third party is signed.

The Authority's non-operating revenues are derived, among others, from Commonwealth appropriations and interest income.

- Commonwealth appropriations are composed of Commonwealth appropriations made for a specific purpose or with a restriction. Funds received through program revenues for a specific purpose are recognized as deferred inflows of resources at the moment that appropriated funds are received and recognized as revenues at the moment the funds are used for the purpose that were assigned to the Authority. Appropriations received from the Commonwealth without restrictions are recognized as revenues when received.
- Interest income - is composed of interest earned on deposits.

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
(A Component Unit of the Commonwealth of Puerto Rico)

**NOTES TO BASIC FINANCIAL STATEMENTS**  
June 30, 2019

---

**Accounts Receivable**

Accounts receivable are stated net of estimated allowance for uncollectible accounts. The allowance is based on the evaluation of the risk characteristics of the receivable, including past collection experience and current economic conditions. Write-offs are recorded against the allowance when management believes that collectability is unlikely. Recoveries of amounts previously charged off are credited to the allowance. Because of uncertainties inherent in the estimation process, management's estimate may change in the future.

**Intergovernmental Receivable**

Intergovernmental receivable is stated net of estimated allowance for uncollectible accounts, which is determined, based upon past collection experience and current economic conditions. Intergovernmental receivable primarily represent amount requested to the Federal Emergency Management Agency (FEMA) related to natural disaster expenses incurred by subgrantees. This intergovernmental receivable is recognized as revenue in the governmental funds when it becomes measurable and available. In applying the susceptible to accrual concept to federal grants, revenue is recognized when all applicable eligibility requirements are met (typically, when related expenditures are incurred) and the resources are available. Resources received before eligibility requirements are met, other than timing, are considered unearned revenue. Resources received before timing requirements are met are considered deferred inflows of resources.

**Prepaid Expenses**

Certain payments to vendors represent costs applicable to future accounting periods and are recorded as prepaid items in the government-wide financial statements.

**Capital Assets**

Capital assets are stated at cost less accumulated depreciation. Capital assets are defined by the Authority as assets that have a cost of \$500 or more at the date of acquisition and have an expected useful life of three or more years. Contributed assets are recorded at estimated fair value at the time received. Depreciation is charged to operations and included within expenses and is computed on the straight-line basis over the estimated useful lives of the depreciable assets. In governmental funds financial statements, capital assets are recorded as expenditures, and no depreciation is recognized. Costs of maintenance and repairs which do not improve or extend the lives of the respective assets are charged to expense as incurred. Estimated useful lives are as follows:

<u>Capital Assets</u>	<u>Years</u>
Information systems	3-5 years
Furniture and equipment	5 years

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

The Authority follows the provisions of GASB Statement No. 42, *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries*, an amendment to GASB Statement No.34. This statement establishes guidance for accounting and reporting for the impairment of capital assets and for insurance recoveries. In accordance with these provisions, governments are required to evaluate prominent events or changes in circumstances affecting capital assets to determine whether impairment of a capital asset has occurred. Such events or changes in circumstances that may be indicative of impairment include evidence of physical damage, enactment or approval of laws or regulations or other changes in environmental factors, technological changes or evidence of obsolescence, changes in the manner or duration of use of a capital asset, and construction stoppage, among others. The Authority evaluated its capital assets as required by GASB Statement No. 42 and no impairment was identified during the fiscal year ended June 30, 2019.

#### **Compensated Absences**

The vacation policy of the Authority generally provides for the accumulation of 1.25 days per month up to an annual amount of 15 days. Vacation time accumulated is fully vested by the employees from the first day of work up to a maximum of 60 days. Employees generally accumulate sick leave at a rate of 1.5 days per month up to an annual maximum of 18 days and a maximum accumulation of 90 days. Act 26-2017 was enacted to modify the existent legal and judiciary framework to be able to comply with the Fiscal Plan approved by the Oversight Board. In addition to accrual modifications, Act 26-2017 also altered the liquidation terms. After the enactment of Act 26-2017, only compensation of accrued vacation leaves, up to 60 days, is paid upon employment termination. In order to be eligible to receive compensation, an employee must have been employed for at least three months. Accumulated unpaid sickness days are no longer liquidated upon employment termination. The liability for compensated absences reported in the government-wide and proprietary fund financial statements has been calculated using the vesting method, in which leave amount for an employee who currently is eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments upon termination, are included. The liability has been calculated based on the employees' current salary level and includes payroll related costs (e.g., social security and Medicare tax).

#### **Deferred Inflows of Resources**

In addition to liabilities, the Statement of Net Position (Deficit) reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time.

#### **Unearned Revenues**

During the year ended June 30 2019 the Authority received Commonwealth appropriations for the development of a public private partnership from which \$26.4 million are presented as part of unearned revenues. Also, during the year ended June 30, 2019 the Authority received funds from the Puerto Rico Electric Power Authority for the development of Public Private Partnerships related to generation of energy, from which, approximately \$3.8 million are presented as unearned revenues in the statement net position.

Unearned revenues are presented as service charge revenues when expenses are incurred in relation for the creation of a public private partnership.

### Interfund Activity

The Authority had the following interfund activity:

*Interfund Transfer*- Legally required transfers are reported when incurred as transfer in by the recipient fund and as transfer out by the disbursing fund, with receivables and payables presented as amounts due to and due from other funds. Advances between funds are also presented as amounts due to and due from other funds. However, these advances, transfers, and related amounts receivable and payable are considered internal balances and activities that have been eliminated in the government-wide financial statements. Interfund receivables are stated net of estimated allowances for uncollectible accounts, which are determined based upon past collection experience and current economic conditions.

### Use of Estimates

The preparation of the basic financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the basic financial statements, and the reported amounts of revenue and expenses/expenditures during the reporting period. Actual results could differ from those estimates.

### Accounting Pronouncements Issued but Not Yet Effective

The following new accounting pronouncements have been issued but are not yet effective:

- **GASB Statement No. 83, *Certain Asset Retirement Obligations*.** This Statement addresses accounting and financial reporting for certain asset retirement obligations (AROs). An ARO is a legally enforceable liability associated with the retirement of a tangible capital asset. A government that has legal obligations to perform future asset retirement activities related to its tangible capital assets should recognize a liability based on the guidance in this Statement. The requirements of this Statement are effective for reporting periods beginning after June 15, 2019, as amended by GASB Statement No. 95.
- **GASB Statement No. 84, *Fiduciary Activities*.** The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. The requirements of this Statement are effective for reporting periods beginning after December 15, 2019, as amended by GASB Statement No. 95.
- **GASB Statement No. 87, *Leases*.** The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases by governments. This Statement increases the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about governments' leasing activities. The requirements of this Statement are effective for fiscal years beginning after June 15, 2021, as amended by GASB Statement No. 95.

- **GASB Statement No. 88, *Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements*.** The primary objective of this Statement is to improve the information that is disclosed in notes to government financial statements related to debt, including direct borrowings and direct placements. It also clarifies which liabilities governments should include when disclosing information related to debt. This Statement defines debt for purposes of disclosure in notes to financial statements as a liability that arises from a contractual obligation to pay cash (or other assets that may be used in lieu of cash) in one or more payments to settle an amount that is fixed at the date the contractual obligation is established. This Statement requires that additional essential information related to debt be disclosed in notes to financial statements, including unused lines of credit; assets pledged as collateral for the debt; and terms specified in debt agreements related to significant events of default with finance-related consequences, significant termination events with finance-related consequences, and significant subjective acceleration clauses. For notes to financial statements related to debt, this Statement also requires that existing and additional information be provided for direct borrowings and direct placements of debt separately from other debt. The requirements of this Statement are effective for reporting periods beginning after June 15, 2019, as amended by GASB Statement No. 95.
- **GASB Statement No. 89, *Accounting for Interest Cost Incurred Before the End of a Construction Period*.** This Statement establishes accounting requirements for interest cost incurred before the end of a construction period. Such interest cost includes all interest that previously was accounted for in accordance with the requirements of paragraphs 5-22 of Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*, which are superseded by this Statement. This Statement requires that interest cost incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset reported in a business-type activity or enterprise fund. This Statement also reiterates that in financial statements prepared using the current financial resources measurement focus, interest cost incurred before the end of a construction period should be recognized as an expenditure on a basis consistent with governmental fund accounting principles. The requirements of this Statement are effective for reporting periods beginning after December 15, 2020, as amended by GASB Statement No. 95.
- **GASB Statement No. 90, *Majority Equity Interests*.** The primary objectives of this Statement are to improve the consistency and comparability of reporting a government's majority equity interest in a legally separate organization and to improve the relevance of financial statement information for certain components units. It defines a majority equity interest and specifies that a majority equity interest in a legally separate organization should be reported as an investment if a government's holding of the equity interest meets the definition of an investment. The requirements of this Statement are effective for reporting periods beginning after December 15, 2019, as amended by GASB Statement No. 95.
- **GASB Statement No. 91, *Conduit Debt Obligations*.** The primary objectives of this Statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (i) commitments extended by issuers, (ii) arrangements associated with conduit debt obligations, and (iii) related note disclosures. This Statement achieves those objectives by clarifying the existing definition of a conduit debt obligation; establishing that a conduit debt obligation is not a liability of the issuer; establishing standards for accounting and financial reporting of additional commitments and voluntary commitments extended by issuers and arrangements associated with conduit debt obligations; and improving required note disclosures.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

This Statement also addresses arrangements - often characterized as leases - that are associated with conduit debt obligations. In those arrangements, capital assets are constructed or acquired with the proceeds of a conduit debt obligation and used by third-party obligors in the course of their activities. Payments from third-party obligors are intended to cover and coincide with debt service payments. During those arrangements, issuers retain the titles to the capital assets. Those titles may or may not pass to the obligors at the end of the arrangements.

This Statement requires issuers to disclose general information about their conduit debt obligations, organized by type of commitment, including the aggregate outstanding principal amount of the issuers' conduit debt obligations and a description of each type of commitment. The requirements of this Statement are effective for reporting periods beginning after December 15, 2021, as amended by GASB Statement No. 95.

- **GASB Statement No. 92, *Omnibus 2020***. The objectives of this Statement are to enhance comparability in accounting and financial reporting and to improve the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements. This Statement addresses a variety of topics and includes specific provisions about the following: The effective date of *Statement No. 87, Leases, and Implementation Guide No. 2019-3*, Leases, for interim financial reports; reporting of intra-entity transfers of assets between a primary government employer and a component unit defined benefit pension plan or defined benefit other postemployment benefit (OPEB) plan; the applicability of *Statements No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*, as amended, and *Statement No. 74, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, as amended, to reporting assets accumulated for postemployment benefits; the applicability of certain requirements of *Statement No. 84, Fiduciary Activities*, to postemployment benefit arrangements; measurement of liabilities (and assets, if any) related to asset retirement obligations (AROs) in a government acquisition; reporting by public entity risk pools for amounts that are recoverable from reinsurers or excess insurers; reference to nonrecurring fair value measurements of assets or liabilities in authoritative literature; and terminology used to refer to derivative instruments. The requirements of this Statement are effective for reporting periods beginning after June 15, 2021, as amended by GASB Statement No. 95.
- **GASB Statement No. 93, *Replacement of Interbank Offered Rates (IBOR)***. The objective of this Statement is to address accounting and financial reporting implications that result from the replacement of an IBOR most notably the London Interbank Offered Rate (LIBOR). As a result of global reference rate reform, LIBOR is expected to cease to exist in its current form at the end of 2021, prompting governments to amend or replace financial instruments for the purpose of replacing LIBOR with other reference rates, by either changing the reference rate or adding or changing fallback provisions related to the reference rate.

This statement achieves its objective by:

- Providing exceptions for certain hedging derivative instruments to the hedge accounting termination provisions when an IBOR is replaced as the reference rate of the hedging derivative instrument's variable payment.
- Clarifying the hedge accounting termination provisions when a hedged item is amended to replace the reference rate.
- Clarifying that the uncertainty related to the continued availability of IBORs does not, by itself, affect the assessment of whether the occurrence of a hedged expected transaction is probable.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

- Removing LIBOR as an appropriate benchmark interest rate for the qualitative evaluation of the effectiveness of an interest rate swap.
- Identifying a Secured Overnight Financing Rate and the Effective Federal Funds Rate as appropriate benchmark interest rates for the qualitative evaluation of the effectiveness of an interest rate swap.
- Clarifying the definition of reference rate, as it is used in GASB Statement No. 53, as amended.
- Providing an exception to the lease modifications guidance in GASB Statement No. 87, as amended, for certain lease contracts that are amended solely to replace an IBOR as the rate upon which variable payments depend.

The removal of LIBOR as an appropriate benchmark interest rate is effective for reporting periods ending after December 31, 2021. All other requirements of this Statement are effective for reporting periods beginning after June 15, 2021, as amended by GASB No. 95. The exceptions to the existing provisions for hedge accounting termination and lease modifications in this Statement will reduce the cost of the accounting and financial reporting ramifications of replacing IBORs with other reference rates. The reliability and relevance of reported information will be maintained by requiring that agreements that effectively maintain an existing hedging arrangement continue to be accounted for in the same manner as before the replacement of a reference rate. As a result, this Statement will preserve the consistency and comparability of reporting hedging derivative instruments and leases after governments amend or replace agreements to replace an IBOR.

- ***GASB Statement No. 94, Public Private and Public-Public Partnership and Availability Payment Arrangement.*** The primary objective of this Statement is to improve financial reporting by addressing issues related to public-private and public-public partnership arrangements (PPPs). A PPP is an arrangement in which a government (the transferor) contracts with an operator (a governmental or nongovernmental entity) to provide public services by conveying control of the right to operate or use a nonfinancial asset, such as infrastructure or other capital asset (the underlying PPP asset), for a period of time in an exchange or exchange-like transaction. Some PPPs meet the definition of a service concession arrangement (SCA), which is defined as: (1) the operator collects and is compensated by fees from third parties; (2) the transferor determines or has the ability to modify or approve which services the operator is required to provide, to whom the operator is required to provide the services, and the prices or rates that can be charged for the services; and (3) the transferor is entitled to significant residual interest in the service utility of the underlying PPP asset at the end of the arrangement. This Statement also provides guidance for accounting and financial reporting for availability payment arrangements (APAs). An APA is an arrangement in which a government compensates an operator for services that may include designing, constructing, financing, maintaining, or operating an underlying nonfinancial asset for a period of time in an exchange or exchange-like transaction.

The requirements of this Statement are effective for fiscal years beginning after June 15, 2022, and all reporting periods thereafter. Earlier application is encouraged.

- ***GASB Statement No. 95, Postponement of the Effective Dates of Certain Authoritative Guidance.*** The primary objective of this Statement is to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. That objective is accomplished by postponing the effective dates of certain provisions in Statements and Implementation Guides that first became effective or are scheduled to become effective for periods beginning after June 15, 2018, and later.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

The effective dates of certain provisions contained in the following pronouncements are postponed by one year:

- Statement No. 83, Certain Asset Retirement Obligations
- Statement No. 84, Fiduciary Activities
- Statement No. 88, Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements
- Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period
- Statement No. 90, Majority Equity Interests
- Statement No. 91, Conduit Debt Obligations
- Statement No. 92, Omnibus 2020
- Statement No. 93, Replacement of Interbank Offered Rates
- Implementation Guide No. 2017-3, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions (and Certain Issues Related to OPEB Plan Reporting)
- Implementation Guide No. 2018-1, Implementation Guidance Update—2018
- Implementation Guide No. 2019-1, Implementation Guidance Update—2019
- Implementation Guide No. 2019-2, Fiduciary Activities.

The effective dates of the following pronouncements are postponed by 18 months:

- Statement No. 87, Leases
- Implementation Guide No. 2019-3, Leases.

Earlier application of the provisions addressed in this Statement is encouraged and is permitted to the extent specified in each pronouncement as originally issued.

The requirements of this Statement are effective immediately.

- **GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*.** This Statement provides guidance on the accounting and financial reporting for subscription-based information technology arrangements (SBITAs) for government end users (governments). This Statement (1) defines a SBITA; (2) establishes that a SBITA results in a right-to-use subscription asset-an intangible asset-and a corresponding subscription liability; (3) provides the capitalization criteria for outlays other than subscription payments, including implementation costs of a SBITA; and (4) requires note disclosures regarding a SBITA. To the extent relevant, the standards for SBITAs are based on the standards established in Statement No. 87, *Leases*, as amended.

The requirements of this Statement are effective for fiscal years beginning after June 15, 2022, and all reporting periods thereafter. Earlier application is encouraged.

- **GASB Statement No. 97, *Certain Component Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans - An Amendment of GASB Statements No. 14 and No. 84, and a Supersession of GASB Statement No. 32.*** The primary objectives of this Statement are to (1) increase consistency and comparability related to the reporting of fiduciary component units in circumstances in which a potential component unit does not have a governing board and the primary government performs the duties that a governing board typically would perform; (2) mitigate costs associated with the reporting of certain defined contribution pension plans, defined contribution other than postemployment benefit (OPEB) plans, and employee benefit plans other than pension plans or OPEB plans (other employee benefit plans) as fiduciary component units in fiduciary fund financial statements; and (3) enhance the relevance, consistency, and comparability of the accounting and financial reporting for Internal Revenue Code (IRC) Section 457 deferred compensation plans (Section 457 plans) that meet the definition of a pension plan and for benefits provided through those plans.

The following requirements of this Statement are effective immediately: (1) exemption of primary governments that perform the duties that a governing board typically performs from treating the absence of a governing board the same as the appointment of a voting majority of a governing board in determining whether they are financially accountable for defined contribution pension plans, defined contribution OPEB plans, or other employee benefit plans and (2) limitation on the applicability of the financial burden criterion in paragraph 7 of Statement 84 to defined benefit pension plans and defined benefit OPEB plans that are administered through trusts that meet the criteria in paragraph 3 of Statement 67 or paragraph 3 of Statement 74, respectively.

The requirements of this Statement that are related to the accounting and financial reporting for Section 457 plans are effective for fiscal years beginning after June 15, 2021. For purposes of determining whether a primary government is financially accountable for a potential component unit, the requirements of this Statement that provide that for all other arrangements, the absence of a governing board be treated the same as the appointment of a voting majority of a governing board if the primary government performed the duties that a governing board typically would perform, are effective for reporting periods beginning after June 15, 2021. Earlier application of those requirements is encouraged and permitted by requirement as specified within this Statement.

The Board considered the effective dates for the requirements of this Statement in light of the COVID-19 pandemic and in concert with Statement No. 95, Postponement of the Effective Dates of Certain Authoritative Guidance.

- **GASB Statement No. 98, *The Annual Comprehensive Financial Report***- This Statement establishes the term *annual comprehensive financial report* and its acronym ACFR. That new term and acronym replace instances of *comprehensive annual financial report* and its acronym in generally accepted accounting principles for state and local governments.

This Statement was developed in response to concerns raised by stakeholders that the common pronunciation of the acronym for comprehensive annual financial report sounds like a profoundly objectionable racial slur.

The requirements of this Statement are effective for fiscal years ending after December 15, 2021. Earlier application is encouraged.

Management is evaluating the impact that these Statements will have on the Authority's basic financial statements.

### 3. RECLASSIFICATIONS

Certain reclassifications were made to prior year basic financials statement in order to conform to this year presentation.

### 4. CHANGE IN REPORTING ENTITY

On March 20, 2018, the Governor of the Commonwealth of Puerto Rico signed Executive Order 2018-11, which transfers the Government Authorized Representative from the Puerto Rico Emergency Management Agency, an Agency of the Commonwealth of Puerto Rico, to the Central Recovery and Reconstruction Office of Puerto Rico.

A change in reporting entity occurs when two or more previously separate entities are combined into one entity for reporting purposes, or when there is a change in the mix of entities being reported. The definition of reporting entity is based primarily on the idea that the reporting entity should encompass all units for which the elected officials are financially accountable, as well as those organizations that do not meet the financial accountability test, but that management feels it would be misleading to exclude (GASB Statement No.61 “The Financial Reporting Entity: Omnibus-an amendment of GASB Statements No. 14 and No. 34”). Since the operations of the COR3 were being managed under the GAR and the GAR is not a component unit of the Commonwealth but a division of PREMA, the Authority is managing the balances related to the COR3 as a change in reporting entity. Any balances that had been recorded in COR3 financial records are being recognized against beginning fund balance in the Authority’s financial statements.

The following tables summarizes the changes to net position at the beginning of the year as previously reported for the Governmental activities in the government-wide and fund financial statements (in thousands):

Government-Wide Financial Statements	<b>Governmental Activities</b>
Net position - July 1, 2018, as previously reported	\$ -
Change in reporting entity - COR 3	(1,123,560)
Net deficit - July 1, 2018, as restated	<u>\$ (1,123,560)</u>
Fund Financial Statements	<b>General Fund</b>
Fund Balance - July 1, 2018, as previously reported	\$ -
Change in reporting entity - COR 3	2,039,775
Fund Balance - July 1, 2018, as restated	<u>\$ 2,039,775</u>

**5. UNCERTAINTY**

The Authority is responsible for the identification and development of Partnerships viable for the delivery of public infrastructure or the provision or enhancement of public services. To that end, Act 29 of 2009, as amended, requires the Authority to prepare or commission the preparation of the desirability and convenience studies to determine the convenience and technical and financial viability for delivery of the project through the Partnership model. Thereafter, upon the study’s conclusion that is desirable and convenient for the project to be delivered as a Partnership, then the Authority is charged with the responsibility of initiating the procurement process for the identification, qualification and selection of potential proponents and the evaluation, negotiation and award of the Partnerships contract. For these services the Authority charges a service fee to other governmental entities for the execution of a Partnership. Currently, the Authority’s main source of revenue consists of legislative appropriations approved in the budget from the Commonwealth and certified by the Fiscal Oversight Management Board (“FOMB”) which are divided as follows: payment in advance for initiating the procurement process for the identification, qualification and selection of potential proponents and the evaluation, negotiation and award of the Partnerships contract for any governmental entity, public corporation or the Commonwealth itself and for operational purposes. Also, the FOMB approved fiscal plans in Commonwealth Instrumentalities including funds for future Partnerships and the payment of Authority services. As a result, the Authority’s operations are dependent on the Commonwealth’s ability to continue providing funding to the Authority through legislative appropriations and the collection of charges for the execution of a Public Partnership Agreement.

Management’s evaluation of the Authority’s going concern has identified the financial condition of the Commonwealth as an external matter that may affect the ability of the Authority to continue as a going concern. The Commonwealth and its instrumentalities are in the midst of a profound fiscal crisis and are in the process of restructuring its liabilities under Title III of PROMESA.

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
**(A Component Unit of the Commonwealth of Puerto Rico)**

**NOTES TO BASIC FINANCIAL STATEMENTS**  
**June 30, 2019**

---

**6. CASH AND DEPOSITS**

**Business-Type Activities**

Custodial credit risk is the risk that, in the event of a financial institution’s failure, the Authority’s deposits may not be returned to it. The Commonwealth requires that public funds deposited in commercial banks in Puerto Rico must be fully collateralized for the amount deposited in excess of federal depository insurance.

The table presented below discloses the level of custodial credit risk assumed by the Authority as of June 30, 2019. As of June 30, 2019, none of the depository Authority balance is uninsured and uncollateralized as follows (in thousands):

	<u>Carrying amount</u>	<u>Bank balance</u>	<u>Amount uninsured and uncollateralized</u>
Cash	\$ 27,339	\$ 27,339	\$ -

On August 10, 2018, Government Development Bank (GDB) commenced an action to restructure certain of its indebtedness pursuant to a Qualifying Modification (the Qualifying Modification) under Title VI of the Puerto Rico Oversight Management and Economic Stability Act (“PROMESA”). The United States District Court for the District of Puerto Rico approved GDB’s proposed restructuring on November 6, 2018, and the Qualifying Modification became effective on November 29, 2018.

Pursuant to Act No. 109-2017, also known as the Government Development Bank for Puerto Rico Debt Restructuring Act (the GDB Restructuring Act) and the terms of the Qualifying Modification, claims on account of deposits held by a governmental entity in GDB were set off against loans made by GDB to the same governmental entity. As a result, funds deposited by the Authority in GDB amounting to \$143 thousand were used to pay the line of credit with GDB.

**7. INTERGOVERNMENTAL RECEIVABLE**

**Governmental Activities**

As of June 30, 2019, intergovernmental receivable is composed of \$130.2 million requested to the Federal Emergency Management Agency (FEMA) related to natural disasters expenses incurred by COR3.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

8. ACCOUNTS RECEIVABLE, NET

Business-Type Activities

As of June 30, 2019, the Authority's accounts receivable, net of allowance, is composed of the following (in thousands):

Description	Amount
Puerto Rico Electric Power Authority (PREPA)	\$ 345
Municipality of Caguas, Department of Transportation and Public Works and the Puerto Rico Highway and Transportation Authority	6,577
Puerto Rico Maritime Transport Authority and Puerto Rico Integrated Transportation Authority	780
Others	10
Total accounts receivable	7,712
Less: allowance for uncollectible accounts	(7,702)
Net receivables	\$ 10

The accounts receivable as of June 30, 2019, are described as follows:

- Puerto Rico Electric Power Authority (PREPA) is related to the *Liquid Natural Gas Supply and Development of Related Infrastructure* project for PREPA.
- Municipality of Caguas, Department of Transportation and Public Works and the Puerto Rico Highway and Transportation Authority is related to Caguas – San Juan Mass Transportation Commuter Project.
- Puerto Rico Maritime Transport Authority and Puerto Rico Integrated Transportation Authority relates to the maritime transport project.

The above receivables are outstanding principally since June 30, 2015, without any repayment. Based on this and management's evaluation and after conversations with the respective agencies, the Authority understand that such receivables are not going to be collected as a result an allowance for doubtful account was provided in fiscal year ended June 30, 2017.

**10. COMPENSATED ABSENCES**

The activity for compensated absences as of June 30, 2019, is as follows (in thousands):

**Governmental Activities**

<u>Description</u>	<u>Beginning balance</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending balance</u>	<u>Due within one year</u>
Accrued vacations	\$ 94	\$ 231	\$ (81)	\$ 244	\$ 176
	<u>\$ 94</u>	<u>\$ 231</u>	<u>\$ (81)</u>	<u>\$ 244</u>	<u>\$ 176</u>

**Business-Type Activities**

<u>Description</u>	<u>Beginning balance</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending balance</u>	<u>Due within one year</u>
Accrued vacations	\$ 27	\$ 45	\$ (38)	\$ 34	\$ 34
	<u>\$ 27</u>	<u>\$ 45</u>	<u>\$ (38)</u>	<u>\$ 34</u>	<u>\$ 34</u>

**11. LINE OF CREDIT**

On March 17, 2010, the Authority entered a \$20 million revolving line of credit facility with GDB to provide financing for the Authority’s operations. The credit facility expired on January 31, 2016, and bears interest at 7% (150 basis points over the prime rate at June 30, 2019) or 7%, whichever is higher. The source of repayment of this line of credit is the fees charged by the Authority for services provided as part of the process to establish the Partnerships.

On November 29, 2018, Government Development Bank (GDB) completed a restructuring of certain of its indebtedness pursuant to a Qualifying Modification under Title VI of PROMESA. Under the Qualifying Modification, holders of certain bond and deposit claims against GDB exchanged their claims for bonds (at an upfront exchange ratio of 55%) issued by a newly created public instrumentality—the GDB Debt Recovery Authority (the DRA) created under Act No. 109 of August 24, 2017, known as the Government Development Bank for Puerto Rico Debt Restructuring Act (the GDB Restructuring Act)—and GDB transferred to such entity its municipal loan portfolio, a portion of its public entity loan portfolio, its real estate owned assets and its unencumbered cash. This GDB Restructuring Act required certain offsets between financial instruments assets and liabilities held by GDB; therefore, the deposits held by the Authority amounting to \$143 thousand at GDB were applied to notes payable owed by the Authority to GDB. Note that line of credit owed by the Authority to GDB was not transferred to the DRA as a result line of credit was retained by GDB after the execution of the RSA.

Pursuant to the GDB Restructuring Act, “all transactions effected pursuant [thereto] (including, without limitation, pursuant to determinations made by Puerto Rico Fiscal Agency and Financial Advisory Authority (FAFAA) or GDB under [the GDB Restructuring Act]) shall be valid and binding with respect to all Government Entities [...] and no Government Entity shall have any further rights or claims against GDB [...] the Public Entity Trust, and any officers, directors, employees, agents and other representatives thereof [...]”.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

As of June 30, 2019, the line of credit balance owed to GDB was approximately \$6.2 million and accrued interest payable was approximately \$1.4 million. Interest expense for the year ended June 30, 2019, amounted to \$424 thousand.

## 12. TRANSACTIONS WITH RELATED ENTITIES

During the year ended June 30, 2019, the Authority entered into an agreement with the FAFAA to receive certain management support and administrative services and established a fee to cover those services. The total fee paid to FAFAA for the year ended June 30, 2019, amounted to approximately \$21 thousand. FAFAA, as part of the administrative services provided, may incur on payments on behalf of the Authority to cover certain of its operating expenses, which are paid by the Authority to FAFAA on a later date.

The Authority moved to FAFAA facilities; in which the Authority entered into an agreement with FAFAA for the rental of office space. This agreement calls for lease payments of approximately \$2,300. The lease agreement expired on June 30, 2019, and can be renewed for additional terms as necessity demands so long both parties agree.

## 13. INTER-GOVERNMENTAL AGREEMENTS

The Authority has entered into inter-governmental agreements (the “Agreements”) as part of implementing the public policy on Partnerships as established by Act No. 29 of 2009.

At present, the Authority is carrying out the following projects (the “Projects”):

***Water Consumption Measurement System Optimization Project-*** The advanced water measurement project (PRASA Project) provides for the potential concession of the replacement of the outdated meters of the Puerto Rico Aqueduct and Sewer Authority by advanced and intelligent meters, to reduce non-revenue water. This will increase operational efficiency and operating income by incorporating advanced technologies and innovation and optimization of practices and services. On March 27, 2018, the Authority’s Board of Directors (the Board) approved the Desirability and Convenience Study. On June 18, 2018, the Authority published the Request for Qualifications and on September 28, 2018, the Partnership Committee notified the selection of the qualified proponents.

After selecting the qualified proponents, the Partnership Committee evaluated the proposals submitted and notified the selection of the Preferred Proponent. On November 30, 2021 the board of directors of the Authority decided to cancel this project.

***Social Infrastructure Project-*** The social infrastructure project (the Student Life Project), is an initiative in collaboration with the University of Puerto Rico, Mayagüez Campus (Campus), to transform and renovate the facilities of the Campus through the development, operation, construction and maintenance of housing facilities, parking lots and other service facilities that they attend to the needs of the students and of life in the Campus. The goal of transformation of the Campus facilities is to enrich the student experience by offering an attractive housing alternative within the Campus with more social and recreational alternatives, modern study and collaboration spaces, and innovative solutions to improve the quality of life of the students and the community of the Campus. This in turn will enhance academic performance and it will increase student retention.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

On October 16, 2017, the Authority published a Draft Request for Qualifications to know the market input around the Student Life Project. The results of the market survey were considered in the evaluation of the project, particularly for the purpose of specifying and delimit the scope of the Desirability and Convenience Study. On March 1, 2018, the Study was completed successfully and approved by the Board. On July 13, 2018, the Partnership Committee notified the selection of the qualified proponents.

After selecting the qualified proponents, the Partnership Committee evaluated the proposals submitted and notified the selection of the Preferred Proponent. At present, the Authority is in the negotiation process with the preferred proponent including other discussions related to the development of the Project. This process has faced delays due to the impact of COVID-19, among other reasons.

**Partnership Project for the San Juan Bay Cruise Terminals-** In 2017, Global Ports Holdings PLC., through the mechanism of an Unsolicited Proposal, presents the Partnership Project for the San Juan Bay Cruise Terminals. The unsolicited proposal proposes a long-term concession for world-class modernization, expansion, and operation of the passenger seaports, specifically in Piers 1, 3, 4, 11 to 14, and Pan Americans 1 and 2 of San Juan Bay. It also including repairs and a long-term maintenance program of maritime facilities. On June 14, 2018, the Board approved the Desirability and Convenience Study. On September 5, 2018, the Partnership Committee continued with the processes for the formalization of the Partnership by publishing the Request for Qualifications. On November 16, 2018, the Partnership Committee notified the selection of the qualified proponents.

After selecting the qualified proponents, the Partnership Committee evaluated the proposals submitted and notified the selection of the Preferred Proponent. At present, the Authority is in the negotiation process with the preferred proponent including other discussions related to the development of the Project. This process has faced delays due to the impact of COVID-19, among other reasons.

**Public Safety Training Center Project-** Ana G. Méndez University System submitted an unsolicited proposal as an initiative that seeks to strengthen specialized education for public security forces through the offering of specialized curriculum, training courses for new members and courses for the certification and recertification of continuing education for the six bureaus of Public Safety Department (the DPS) and the Corrections and Rehabilitation Department (the DCR). On October 23, 2018, the Board approved the Desirability and Convenience Study. On February 20, 2019, the Authority published the Request for Qualifications and on April 11, 2019, the Partnership Committee notified the selection of the qualified proponents.

Currently, the Authority is waiting for both the DPS and the DCR to submit information necessary to complete the preparation of the Request for Proposals and proceed to the eventual publication of it.

**Palo Seco Generation Plant Project-** The metropolitan area in northern Puerto Rico has the highest demand for electric cargo, but most of the energy generated comes from plants in the south, an imbalance that leads to a high level of loss of power in the lines. Palo Seco and Central San Juan units do not meet the real demand of energy of the north of Puerto Rico. Units 1 and 2 of Palo Seco, with a capacity of 85 MW each, have been in service for almost sixty years, are not in operation and they will retire soon. For their part, Palo Seco Units 3 and 4 have been in service for over fifty years. Although the Palo Seco Unit 3 and 4 have a capacity of 216 MW, currently Unit 4 is being repaired and Unit 3 is limited to 160 MW.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

Through this project, a private operator will be responsible for carrying out the design, permission, financing, construction, management, operation, and maintenance of a new facility of dual fuel combined cycle generation with a capacity of approximately 300 MW, which will be interconnected to the currently existing 115 kV substation corresponding to the Palo Seco power plant. This facility will be in the Palo Seco Power Plant land or land adjacent to it. The private operator will sell, and the Electric Power Authority (“PREPA”) will buy the net electricity production of the installation generation, in accordance with the contract. During the term of the contract, the private operator will provide operation and maintenance services for said facility. The project pursues improve the reliability of the electrical system, particularly to support energy demand from the north of Puerto Rico.

On July 12, 2019, the Authority published the Request for Qualifications and on June 10, 2020, the Partnership Committee notified the selection of the qualified proponents. Considering the recent situation in the energy sector of Puerto Rico, the Authority is evaluating components of public policy to determine the steps to follow around this project.

**Hydroelectric Plants Revitalization Project-** The revitalization of hydroelectric plants project consists of the following facilities: Caonillas 1 and 2 in the Utuado Municipality; Garzas 1 and 2 in the Peñuelas Municipality; Patillas; Río Blanco in the Naguabo Municipality; Yauco 1 and 2; and Dos Bocas in the Arecibo Municipality. As part of this project, the Authority and PREPA are interested in forming a Partnership with one or more proponents, including Municipalities, Municipal Consortiums and companies of the private sector or consortiums, for the operation and maintenance of said hydroelectric system, or a part of it, in addition to the investment of capital improvements for its rehabilitation.

The system that will comprise the hydroelectric generation facilities will consist of 11 facilities with a combined generation capacity of approximately 100 MW. Currently, the available capacity of these facilities is 27 MW. Through the present Partnership, it is pursued increase the generation capacity of these hydroelectric facilities to at least of approximately 70 MW.

This project contemplates the conclusion of a long-term contract with one or more entities. The Partnership contract structure could be one of the following: (1) a long-term lease of the facilities and a Power Purchase and Operation Agreement (PPOA) with PREPA; or (2) Operation agreement and long-term maintenance. During the term of the contract, the Government will retain the property and ownership of each hydroelectric facility of the project, and the entity will manage and will operate the hydroelectric facility. In addition, the selected entity will assist with the acquisition, administration and use of federal funds for the restoration of the hydroelectric system in case they are available.

On April 16, 2019, the Authority issued the Request of Qualifications where interested entities were requested to submit their qualifications no later than July 22, 2019. On November 25, 2019, the Partnership Committee notified the selection of the qualified proponents. Considering the recent situation in the energy sector of Puerto Rico, the Authority is evaluating components of public policy to determine the steps to follow around this project.

**Energy Storage Project-** Through this Project, the hiring of a private entity is contemplated to be responsible to carry out the development of a large-scale energy storage system in certain critical facilities to provide greater stability to Puerto Rico's energy system while provides resilience and responsiveness to power system fluctuations or blackouts. The project also seeks to reduce network costs by increasing operational efficiency of this, to meet the renewable energy objectives established by Act No. 17-2019, known as the Puerto Rico Energy Public Policy Law and offer operational flexibility that allows the modernization of the network in an expeditious time, among other objectives and benefits of the project.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

Specifically, the project contemplates an energy storage system in the substations of Sabana Llana and Bayamón, with an optional third facility in Humacao/Yabucoa.

On May 12, 2018, the Authority published the Desirability and Convenience Study. On June 22, 2018, the Authority published the Request for Qualifications by virtue of which, the Partnership Committee notified the selection of the qualified proponents.

On October 12, 2018, the Authority issued the Request for Proposals. On or before January 11, 2019, they were received. Due to delays in the process of acquiring federal funds, the preferred proponent selection process remains delayed.

**Flexible Power Distribution Units Project-** The project pursues for a private entity to be the owner and operator of a fleet of 15 units flexible mobile or fixed power distribution systems (or a combination) with an individual capacity between 10-30 MW, for a total of approximately 450 MW. This project contemplates the granting of a “Power Purchase and Operation Agreement” with PREPA for a period of 25 years. These new dual fuel units (natural gas and diesel) will replace the fleet of gas turbines of PREPA and will use the existing interconnection framework. The private entity will be in charge of the design, permission, financing and installation of the units. The PREPA anticipates that these units may eventually be relocated where necessary to stabilize the electrical network to meet the capacity requirements for the mini networks that are planned to eventually be established.

As previously mentioned, this project could generate up to a maximum of 450 MW through the location of the referred units in the following PREPA facilities: (1) Hidrogas Costa Sur; (2) Aguirre Station; (3) Jobos Station (Guayama); (4) Yabucoa Station; (5) Vega Baja Station; (6) Palo Viejo Complex; and (7) Daguao Station (Ceiba).

On July 12, 2019, the Authority published the Request for Qualifications. On July 7, 2020, the Authority issued to the interested proponents a notification informing that the Request for Qualifications would be extended. In said notification, the Authority also informed that the selection of the Qualified Proponent would be postponed subject to final approval of the Integrated Resource Plan that had been submitted by PREPA to the Puerto Rico Energy Bureau. Considering the recent situation in the Puerto Rico energy sector, the Authority is evaluating components of public policy to determine the steps to follow around this project.

**Legacy Generation Assets Project-** Even before the impact of Hurricanes Irma and María and the 2019-2020 earthquakes, Puerto Rico it already had a poor energy infrastructure. Although some of the Legacy Generation Assets of PREPA have been modernized to natural gas, many of the assets operate based on diesel, which is inefficient, expensive, and is the main reason for the high cost in the electric rate of Puerto Rico. PREPA together with the Authority are working on several initiatives to modernize the Puerto Rico's energy system, which seek to reduce dependence on the use of diesel, increase the use of natural gas and renewable energy, increase the efficiency and resilience of the system, invest in repairs to facilities, and withdraw, replace, or modernize Inefficient Generation Assets.

This project contemplates entering a contract with one or more private operators with tied terms directly to the remaining useful life of the Legacy Generation Assets for the management, operation, maintenance and seizure, as applicable, of these assets. In this way, the project pursues improve the efficiency and resilience of the electricity system using the experience of the private sector to the operation, maintenance and seizure of the Generation Assets as established in the Plan Integrated Resource.

On August 10, 2020, the Authority published the Request for Qualifications. On October 22, 2020, the Partnership Committee notified the selection of the qualified proponents. Subsequently, the Authority issued the Request for Proposals.

Currently, qualified proponents are in the due diligence process in preparation for the presentation of the respective proposals for the consideration of the Partnership Committee.

*Others-* The Authority is evaluating other projects such as the Modernization of the Services and Collections of the Department of the Treasury of Puerto Rico, Regional Airports of the Puerto Rico Ports Authority and the Modernization of the Authority's Digital Infrastructure of Roads and Transportation of the Puerto Rico Highway and Transportation Agency.

#### 14. RETIREMENT BENEFITS SYSTEMS

##### *PayGo Pension Reform*

The Defined Benefit Pension Plan (the Plan) for Participants of the Employees' Retirement System of the Government of the Commonwealth of Puerto Rico (the System or ERS) was created pursuant to Act No. 447 on May 15, 1951, as amended (Act No. 447), to provide pension and other benefits to retired employees of the Commonwealth, its public corporations and municipalities. Prior to the effect of Act No. 106 of August 23, 2017 (Act No. 106-2017), the Plan was administered by the System. Effective July 1, 2017, all employer contributions were eliminated pursuant to Act No. 106-2017 and the Commonwealth implemented a "pay-as-you-go" (PayGo) system for the payment of pensions. Also pursuant to Act No. 106-2017, the System was required to liquidate its assets and transfer the net proceeds to the Department of Treasury of the Commonwealth to pay pension benefits.

As a result of the implementation of the PayGo system, the Plan does not meet the criteria in paragraph 4 of GASB Statement No. 68, Accounting and Financial Reporting for Pensions, to be considered a plan that is administered through a trust or equivalent arrangement and, therefore, is required to apply the guidance in GASB Statement No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68. Under the guidance of GASB Statement No. 73, the Commonwealth and its component units are considered to be one employer, and are classified for financial reporting purposes as a single-employer defined benefit pension plan.

On June 27, 2017, the Treasury Department issued Circular Letter No. 1300-46-17 to convey to the central government agencies, public corporations and municipalities new implementation procedures for adopting, effective July 1, 2017, the new PayGo system. With the start of fiscal year 2018, employers' contributions, contributions ordered by special laws, and the Additional Uniform Contribution were all eliminated.

The PayGo system was one component of Act No. 106 of 2017. The Act created the legal framework so that the Commonwealth can guarantee benefit payments to current pensioners through the PayGo system. Approximately \$2 billion was allocated for these purposes in each of the budgets for fiscal year 2018 and fiscal year 2019. Act No. 106-2017 also created a Defined Contributions Plan, similar to a 401(k) plan, which is managed by a private entity. Future benefits will not be paid by the Retirement Systems.

Act No. 106-2017, among other things, amended Act No. 12 with respect to ERS's governance, funding and benefits for active members of the actual program and new hired members. Under Act No. 106-2017, ERS's board of trustees was eliminated, and a new Retirement Board was created. The Retirement Board is currently responsible for governing ERS, the Judiciary Retirement System (JRS), and Teachers Retirement System (TRS).

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
(A Component Unit of the Commonwealth of Puerto Rico)

**NOTES TO BASIC FINANCIAL STATEMENTS**  
**June 30, 2019**

---

Act No. 106-2017 terminated the previously existing pension programs for ERS participants as of June 30, 2017. The members of the prior programs and new System members hired on and after July 1, 2017 have been enrolled in a new defined contributions program selected by the Retirement Board. The accumulated balance on the accounts of the prior program were transferred to the member accounts in the new defined contributions program, effective as of June 22, 2020. ERS' active members of the defined contributions program retained their benefits as stated under Act No. 91 of March 29, 2003.

Act No. 106-2017 also ordered a suspension of ERS's loan programs and ordered a merger of the administrative structures of the Retirement Systems. At the Retirement Board's discretion, the administration of ERS benefits may be externalized. The employees of ERS that are not retained under the new administrative structure will be transferred to other public agencies in conformity with Act No. 8 of February 8, 2017. In addition, Act No. 106-2017 repealed the Voluntary Early Retirement Law, Act No. 211 of 2015, while creating an incentive, opportunities and retraining program for public workers.

As a result of the adoption of the Act 106 the Authority recognized a benefit amounting to \$3.1 million and \$1.8 million in governmental and business type activities, respectively.

**15. COMMITMENT AND CONTINGENCIES**

**Litigation**

The Authority is a party in a legal claim arising in the ordinary course of operations. Management and their legal counsels are of the opinion that the ultimate disposition of this matter will not have a material adverse effect on its financial position and the results of its operations.

**Federal Awards**

COR3 participates in federal financial assistance programs funded by the federal government. Expenditures financed by these programs are subject to financial and compliance audits by the appropriate grantors. If expenditures are disallowed due to noncompliance with grant program regulations, the Bureau may be required to reimburse the grantors. Nevertheless, the program compliance audits of certain programs for or including the fiscal year ended June 30, 2019, have not yet been concluded. Accordingly, the compliance with applicable grant requirements will be established at some future date.

This space left blank intentionally

### Grant Awards and Mission Assignments

The COR3 is a grantee in various Federal Assistance Programs funded by the Federal Government. Entitlement to the resources is generally based on compliance with the terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of the resources for eligible purposes. These grants are described as follows:

- **PA CFDA No. 97.036 Disaster Grants -Public Assistance (Presidentially Declared Disasters)** - To assist state, tribal, territorial, and local governments and eligible private non-profits in responding to and recovering from the devastating effects of disasters by providing assistance for debris removal, emergency protective measures, and the repair, restoration, reconstruction or replacement of public and eligible private non-profit facilities or infrastructure damaged or destroyed as the result of federally declared disasters or emergencies. During fiscal year 2019 the drawdowns from this program amounted to \$2.7 billion. Subsequently there have been additional drawdowns and funds approved related to the earthquakes that occurred in January 2020 and for the pandemic.
- **HMGP CFDA No. 97.039 Hazard Mitigation Program**- The objective of the program is to provide funding support to states, Indian tribal governments, territories, communities, and other eligible applicants to reduce the risk of future damage, loss of life and property in any area affected by a major disaster. This program promotes implementation of activities designed to reduce injuries, loss of life, hardship, suffering, and damage and destruction to property from natural hazards which is consistent with DHS QHSR Goal 5.1, "Mitigate Hazards" and links to Presidential Policy Directive (PPD-8) - National Preparedness, Security, Resilience, Prevention, Mitigation, Response, Protection, and Recovery. During fiscal year 2019 there were no drawdowns although the grant was approved and current.
- **PDM CFDA No. 97.047 Pre-disaster Mitigation**- The Building Resilient Infrastructure and Communities (BRIC) program makes federal funds available to states, U.S territories, Indian tribal governments (federally recognized), and local communities to apply for, implement, and monitor mitigation activities; create and support partnerships; encourage and enable innovative mitigation strategies and project implementation; enhance risk-informed planning and prioritization of mitigation needs; establish building codes and standards to protect the health, safety and general public welfare; and conduct other mitigation activities with a focus on critical services and facilities and large-scale infrastructure. Ultimately, activities funded by BRIC are designed to reduce the long-term risk to individuals and property from natural hazards and build mitigation capacity and capability, while also reducing reliance on federal funding from future disasters. The BRIC program strengthens national preparedness and resilience and supports the mitigation mission area through Strategic Goal #1 Building a Culture of Preparedness, Objectives 1.1, 1.2, 1.3, and 1.4 of the 2018 - 2022 FEMA Strategic Plan. During fiscal year 2019 the drawdowns from this program amounted to \$1.2 million.
- **PDM 93.982 Mental Health Disaster Assistance and Emergency Mental Health** -To provide supplemental emergency mental health counseling to individuals affected by major disasters, including the training of workers to provide such counseling. During fiscal year 2019 the drawdowns from this program amounted to \$4.6 million.

**Mission assignment** – they relate to emergency work performed by a federal entity on behalf of a state entity (i.e., US Army Corps of Engineers performing emergency work for PREPA related to damages to the electrical grid after a disaster). In these cases, FEMA pays the federal agency directly, and thereafter invoices the Government of Puerto Rico, through the COR3/GAR, for any outstanding non-federal cost share balance, if applicable. As such, COR3 does not manage any federal moneys related to Mission Assignments but serves as a pass-through entity in relation to any associated non-federal cost share requirements. The GAR is also responsible for executing related paperwork.

- It for Hurricane María, FEMA estimates the Government of Puerto Rico will receive approximately \$2.9B in disaster funds which will require a match of approximately \$1.1B for a total approximately of \$4B in mitigation grant funding.

The Government continues to coordinate relief and funding efforts to address the natural disasters that have affected Puerto Rico in recent years, under FEMA's Public Assistance (PA) Program. This is FEMA's largest grant program providing funds to assist communities responding to and recovering from major disasters or emergencies declared by the President. The program provides funding for emergency assistance to save lives and protect property, and assists with funding for permanently restoring community infrastructure affected by a federally declared incident. including the continued recovery following Hurricanes Irma and María. As of June 30, 2019, approximately \$5.8 billion has been appropriated by the United States Congress to Puerto Rico for disaster relief and recovery efforts. Of this amount, approximately \$5.7 billion has been committed by federal agencies for distribution and \$3.5 billion has been disbursed. The cost share for the COR3 is approximately \$20.5 million.

## 16. SUBSEQUENT EVENTS

### *Earthquake*

On January 7, 2020, Puerto Rico was struck by a 6.4 magnitude earthquake causing devastating damages to infrastructure, an island-wide power outage, water shortages and threatening the lives of its people. In order to safeguard the health and public safety of its citizens, the Governor issued executive orders EO 2020-01 and EO 2020-02 declaring a state of emergency to activate the emergency purchasing protocol allowing emergency management agencies to acquire the necessary supplies and essential services to provide a timely and effective response and activating the National Guard to provide support during the emergency management.

In addition, the Oversight Board authorized the utilization of Emergency Reserve funds from fiscal years 2019 and 2020 as needed by the Commonwealth without prior approval of reapportionments through January 31, 2020.

President Trump also approved an emergency declaration allowing direct federal assistance for emergency measures to protect lives, property and public health after the series of earthquakes.

On January 11, 2020, the Governor issued executive order EO 2020-07 authorizing the appropriation of \$12 million from the Emergency Fund to be distributed equally between the municipalities of Gúanica, Guayanilla, Peñuelas, Ponce, Utuado and Yauco to be used exclusively for damages and mitigation related to the emergency.

A preliminary assessment of the damages caused by the earthquake and subsequent aftershocks (excluding the May 2, 2020 earthquake discussed below), calculated by the United States Geological Survey, estimated total economic damages ascending to \$836 million.

NOTES TO BASIC FINANCIAL STATEMENTS  
June 30, 2019

---

Puerto Rico continues to experience aftershocks that are not expected to stop any time soon. According to a January 29, 2020 report published by the United States Geological Survey, Puerto Rico is at risk of many potentially catastrophic earthquakes in the near term. In fact, on May 2, 2020, an earthquake with a 5.4 magnitude struck Puerto Rico's southern coast. The seismic event, which briefly knocked out power in some areas, hit near the city of Ponce where hundreds of structures, including homes and houses of worship, remain damaged or destroyed from the devastating earthquakes earlier in 2020. These continued earthquakes are a powerful reminder that although the global COVID-19 pandemic is currently controlling the public spotlight, the physical and psychological threat of natural catastrophes has not subsided for Puerto Rico and its residents.

COR3 is working and processing all request received for reimbursement filed by municipalities, agencies, public corporation and instrumentalities of the Commonwealth and non-for profits entities. Total amount approved amounts to \$630 million from which \$244 million are already disbursed to subrecipient. COR3 received \$1.9 million for administrative expenses.

### **COVID-19 Pandemic**

#### *Executive Orders*

On March 11, 2020, the World Health Organization declared the Coronavirus disease caused by a novel coronavirus (COVID-19) as a global pandemic. As a result of the health threat and to contain the virus spread across the island, Governor Vázquez-Garced issued executive order EO 2020-020, on March 12, 2020, declaring a state of emergency in Puerto Rico to concentrate all efforts and implement necessary measures to safeguard the health, well-being and public safety of the citizens of Puerto Rico. The executive order authorizes the Secretary of the Department of Treasury and the Executive Director of the Puerto Rico Office of Management and Budget to set up a special budget, from any available funds, including the Emergency Fund, to cover all necessary costs for the containment of the virus throughout the island and sharing information with the municipalities.

On March 15, 2020, the Governor issued executive order EO 2020-023 ordering a curfew for all citizens requiring them to stay at home from 9 p.m. to 5 a.m., allowing them to use the public roads, within this time frame, under specific circumstances such as: (1) purchasing food, pharmaceutical and basic necessity products; (2) keeping medical appointments or visiting a hospital, laboratory, or healthcare facility; (3) commuting, for public and private employees who provide essential services; (4) returning to place of residence from an allowed activity; (5) providing assistance, care, transportation of senior citizens, children, dependents, people with disabilities or requiring medical or professional attention; and (6) visiting financial institutions, provided that all necessary precautions are taken to prevent the risk of spreading the disease. Also, the executive order mandated that any person with reasonable suspicion of being exposed to the COVID-19 remain quarantined for fourteen (14) days, as of the issuance of the order, to prevent them from posing a risk to public health and transmission to non-infected persons. In addition, it ordered the closure of all governmental operations, except for those related to essential services, and the closure of all businesses in Puerto Rico from March 15, 2020, at 6 p.m., until March 30, 2020, unless otherwise provided. Furthermore, the order established criminal penalties and fines for any person who failed to comply with the evacuation orders issued by the Commonwealth's Public Safety Department or its Bureaus.

COR3 is working and processing all request for reimbursement filed by municipalities, agencies, public corporation and instrumentalities of the Commonwealth and non-for profits entities. Total amount approved by FEMA amounts to \$169 million from which \$49.8 million already disburse to subrecipient. COR3 received \$1.3 million for administrative purposes.

**PUERTO RICO PUBLIC PRIVATE PARTNERSHIPS AUTHORITY**  
**(A Component Unit of the Commonwealth of Puerto Rico)**

**NOTES TO BASIC FINANCIAL STATEMENTS**  
**June 30, 2019**

---

On March 2020 the Authority transfer \$10 million to the Commonwealth of Puerto Rico which were related appropriation received during the year ended on June 30, 2019 for the development of public private partnerships.

Subsequent events were evaluated by management through January 5, 2022, the date the financial statements were available to be issued, to determine if any such events should either be recognized or disclosed in the financial statements. Management has determined that other than those already disclosed above, there are no material events or transactions that would affect the Authority's financial statements through such date.
