SISCON - ASYCUDA WORLD MAPPING TABLE

Nº	ASYCUDA Segment	XML Tag Name	SYSCON Segment	Field Name	Additional Notes
1	General_segment_id	Customs_office_code			It doesn't exist in Syscon
2	General_segment_id	Voyage_number	Header record	Voyage or Flight Number	
3	General_segment_id	Date_of_departure	Header record	Shipping Date	
4	General_segment_id	Date_of_arrival	Header record	Arrival Date	
5	General_segment_id	Time_of_arrival			It doesn't exist in Syscon
6	Totals_segment	Total_number_of_bols			It doesn't exist in Syscon
7	Totals_segment	Total_number_of_packages			It doesn't exist in Syscon
8	Totals_segment	Total_number_of_containers			It doesn't exist in Syscon
9	Totals_segment	Total_gross_mass			It doesn't exist in Syscon and Asycuda requires it in Kg.
10	carrier	Carrier_code	Header record	Carrier Code	
11	carrier	Carrier_name			It doesn't exist in Syscon
12	carrier	Carrier_address			It doesn't exist in Syscon
13	Transport_information	Mode_of_transport_code			It doesn't exist in Syscon but is defined by the carrier code
14	Transport_information	Identify_of_transporter			It doesn't exist in Syscon
15	Transport_information	Nationality_of_transporter_code			It doesn't exist in Syscon
16	Transport_information	Place_of_transporter			It doesn't exist in Syscon
17	Transport_information	Registration_number_of_transport_code			It doesn't exist in Syscon
18	Transport_information	Date_of_registration			It doesn't exist in Syscon
19	Transport_information	Master_information			It doesn't exist in Syscon
20	Transport_information	IMO_Number	Header record	IMO Number	
21	Transport_information	Docking_Number	Header record	Docking Number	
22	Load_unload_place	Place_of_departure_code			It doesn't exist in Syscon
23	Load_unload_place	Place_of_destination_code			It doesn't exist in Syscon

Nº	ASYCUDA Segment	XML Tag Name	SYSCON Segment	Field Name	Additional Notes
24	Bol_id	Bol_reference	Bill Detail record	Bill of Lading, Airway Bill or House Bill Number	
25	Bol_id	Line_number			it doesn't exist in Syscon but it can be defined by the bl position in the file
26	Bol_id	Bol_nature			It doesn't exist in Syscon
27	Bol_id	Bol_type_code			It doesn't exist in Syscon
28	Bol_id	Master_bol_ref_number	Header record	Master Bill of Lading or Master Airway Bill	
29	Bol_id	Unique_carrier_reference	Header record	Carrier of Origin	
30	Load_unload_place	Place_of_loading_code	Bill Detail record	Origin Port Code	Asycuda uses standard UN codes
31	Load_unload_place	Place_of_unloading_code	Bill Detail record	Discharge Port Code	Asycuda uses standard UN codes
32	Exporter	Exporter_name	Bill Detail record	Exporter Name	
33	Exporter	Exporter_address			It doesn't exist in Syscon
34	Notify	Notify_name	Bill Detail record	Payee Name	
35	Notify	Notify_address			It doesn't exist in Syscon
36	Consignee	Consignee_code	Bill Detail record	Consignee Code	
37	Consignee	Consignee_name	Bill Detail record	Consignee Name (Client)	
38	Consignee	Consignee_address			It doesn't exist in Syscon
39	ctn_segment	Ctn_reference	Bill Detail record	Container Number	
40	ctn_segment	Number_of_packages	Commodity description goods	Commodity Quantity	
41	ctn_segment	Type_of_container			It doesn't exist in Syscon
42	ctn_segment	Empty_Full			It doesn't exist in Syscon
43	ctn_segment	Marks1			It doesn't exist in Syscon
44	ctn_segment	Marks2			It doesn't exist in Syscon
45	ctn_segment	Marks3			It doesn't exist in Syscon
46	ctn_segment	Sealing_Party			It doesn't exist in Syscon
47	Goods_segment	Number_of_packages	Commodity description goods	Commodity Quantity	It doesn't exist in Syscon

Nº	ASYCUDA Segment	XML Tag Name	SYSCON Segment	Field Name	Additional Notes
48	Goods_segment	Package_type_code	Commodity description goods	Package Type	Asycuda uses package codes, SYSCON allows free text package description
49	Goods_segment	Gross_mass	Commodity description goods	Commodity Weight	SYSCON uses pounds, but in Asycuda you have to put the weight in Kg.
50	Goods_segment	Shipping_marks			It doesn't exist in Syscon
51	Goods_segment	Goods_description	Commodity description goods	Commodity Description	
52	Goods_segment	Volume_in_cubic_meters	Commodity description goods	Commodity Volume	Asycuda requires the volume in cubic meters
53	Goods_segment	Num_of_ctn_for_this_bol			It doesn't exist in Syscon, but it is possible to calculate
54	Goods_segment	Information			It doesn't exist in Syscon
55	Seals_segment	Number_of_seals			It doesn't exist in Syscon
56	Seals_segment	Marks_of_seals			It doesn't exist in Syscon
57	Seals_segment	Sealing_party_code			It doesn't exist in Syscon
58	Freight_segment	PC_indicator	Bill Detail record	Payment Type of Freight Charges	
59	Freight_segment	Freight_value	Bill Detail record	Freight Charges Payment Amount	
60	Freight_segment	Freight_currency			It doesn't exist in Syscon, but we take USD as default
61	Customs_segment	Customs_value	Bill Detail record	Bill of Lading - Commodity Value	
62	Customs_segment	Customs_currency			It doesn't exist in Syscon, but we take USD as default
63	Insurance_segment	Insurance_value			It doesn't exist in Syscon
64	Insurance_segment	Insurance_currency			It doesn't exist in Syscon, but we take USD as default
65	Transport_segment	Transport_value			It doesn't exist in Syscon
66	Transport_segment	Transport_currency			It doesn't exist in Syscon, but we take USD as default
67	Location	Location_code			It doesn't exist in Syscon
68	Location	Location_info			It doesn't exist in Syscon
